

RFIDEA

RFID tag for child safety

Smart protection for little explorers!

RFIDEA is a RFID solution aimed at enhancing child safety by leveraging innovative technology. The system involves attaching RFID tags to children's clothing or body, and strategically placing RFID reader devices in key areas of the household.

When a child approaches these sensitive points, the system can issue warnings and even play recorded messages or music through a central speaker.

www.Rfideasolution.com

Key features:

- Integration with IoT system
- Extended functionality with smartwatches
- Warning in sensitive places
- Calling the child through the central speaker
- Calling the police or emergency
- Monitoring temperature, oxygen level, and heart rate
- Adaptability for other vulnerable groups
